**TO:** Board of Supervisors

**FROM:** Louis G. Gibson, Design Engineer 

**VIA:** Glen L. Priddy, Deputy Director of Public Works - Engineering Services

**DATE:** August 1, 2006 

**SUBJECT:** Letter Transmitting Plans and Specifications for Bradford Road and Pierce Avenue, Castle Street, and Madison Street Cooperative Road Project in Cambria, California, Contract Nos. 300296, 300297 and 300298 for Board Approval and Advertisement for Construction Bids

## Recommendation

It is our recommendation that the plans and specifications for the subject contract be approved and the contract be advertised for construction bids. The recommended bid opening date is Thursday, August 31, 2006.

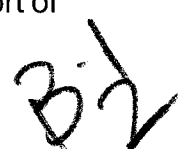

## Discussion

Three individual cooperative road improvement zones have been integrated into one project for cost saving considerations. Each of these individual road projects were reviewed and approved by your Board for zone formation and special benefit tax elections and, subsequently, all three of the projects have met the 2/3 voter approval threshold.

The County's Cooperative Road Improvement Program will construct these improvements with a loan from the General Fund which will be repaid from the proceeds of the special benefit tax over a period of not more than 10 years.

## Other Agency Involvement/Impact

Various utility companies have been contacted in consideration of project impacts to their facilities. Necessary relocation will be managed through the Department's Utility Coordinator. Development of these projects included coordination with and the support of the Cambria Community Services District.

## **Financial Considerations**

The Engineer's estimate for the construction phase of the project is \$401,575. The total estimated cost for the entire project is \$790,217, which is below the voter approved limit. Once the bids have been received, and updated project costs are known, staff will return to the Board with the necessary documents to award the contract.

## **Results**

Approval of the recommended action will result in this project being advertised for construction bids. Ultimately, this project will reduce air pollution caused by road dust, minimize erosion, reduce tire noise, and generally improve the overall quality of life within the community.
